According to our experience, learning a new language is important for the intellectual development of our students, whose future expectations will be improved if they are able to communicate in other languages, apart from the mother tongue.

Undoubtedly, English is their priority since it is considered the most international language, as it allows them to communicate with anyone and anywhere.

On the other hand, French is the second foreign language chosen by most students. Cultural and economic factors are decisive when deciding, along with sharing with Spanish, Portuguese and Galician the same root, Latin, which facilitates the study and understanding of French.

Therefore, we incorporate French into our educational offer with the aim of helping them in their learning. The student learns in a relaxed environment, quickly improving their academic results.
