

EnglishCool thinks that a relaxed atmosphere where students feel confident and enjoy themselves the challenge to learn is absolutely necessary.

We help them to overcome common obstacles in the learning process, such as the fear of speaking or feel ridiculous.

Our small and homogeneous working groups allow a close interaction and integration between all the group members.

Our method is based on flexibility and adaptability. Our worksheets are exclusively created for each student or group, according to their needs, pace of learning and level.

Each student will have his/her own **private area** on our intranet, where he/she will be able to do downloads and work with different material and or didactic sheets, according to its own evolution. It will also be a direct chat between the centre and the student.
